genocide in Darfur:
www.africaaction.org/darfur

There are signs that public pressure is having an effect in our fight to stop the genocide in Darfur, western Sudan where over 400,000 have died and 2.5 million have lost their homes and livelihoods. There is a peace deal between two of the four parties and the UN has an assessment mission on the ground. Unfortunately, the Sudanese government has already violated the agreement and attacks on civilians have doubled since the signing of the peace deal. The U.S. Mission at the United Nations (UN) has indicated support for a resolution that would authorize a UN peacekeeping mission in Darfur with a mandate to protect civilians. Without a peacekeeping mission on the ground there will not be enough security to foster a lasting peace agreement.

We have to keep up the pressure to ensure that the Security Council authorizes such a mission. It is becoming only more important that the U.S. negotiate with all the stakeholders on the ground in Darfur and with the other members of the UN Security Council to achieve a solution that can best protect the people in Darfur. Please join us as we continue to be a witness to the genocide in Darfur and call for the United states to use its power to protect. **Be the public representative of the growing national chorus that will not accept genocide in Darfur.**

Campaign to Stop Genocide in Darfur

Africa Action is engaged in advocacy and activism to stop the genocide in Darfur, Sudan. Although the U.S. government has acknowledged this genocide, it has failed to take the necessary action to protect the people of Darfur. Africa Action's *Campaign to Stop Genocide in Darfur* is calling on the U.S. to work with the United Nations (UN) to provide the African Union (AU) force with a strong mandate to enable it to protect civilians. Africa Action is also calling on the U.S. to seek a UN resolution authorizing a multinational intervention force to support the AU and protect the people of Darfur.

**You can take action today at www.africaaction.org
or sign a postcard to President Bush TODAY!**

Government officials who remained silent during the Rwandan genocide often claim that if Americans had clamored for more government action, the U.S. would have had to work with the UN to intervene, and could have saved hundreds of thousands of lives. Today, this provides us with unique power to protect the people of Darfur.
